

# STA303/1002: Final project regrade declaration

READ THIS DOCUMENT CAREFULLY

For your regrade request to be considered, every member of your group (or just you, if you completed it as an individual) must complete this declaration. All completed declarations must be submitted as PDFs with the detailed and specific regrade **justification** in [this form](#). That is, the form should be submitted only **once** per company/group and must include all the relevant information. For example, a group with three members will need to submit three unique PDF declaration files with their ONE Microsoft form submission.

<b>Company name</b> (as it appears on Quercus):	
<b>Student name</b> (please order your name as it appears on Quercus):	
<b>U of T email address</b>	
<b>UTORid</b> (e.g., leeterry or doejane2)	

In signing this declaration, I (the student named above) confirm that:

- I understand that after regrading this assessment, my final mark could go down, remain the same or increase.
- I have carefully reviewed the instructions, rubric and feedback documentation associated with this assessment.
- I have read and/or written the justification that will be submitted in the regrade form (text and link to file) and believe that it is **specific** in the areas it identifies for regrading and makes reference to the instructions, class materials and rubric items, as appropriate.
- If I/we have submitted a link to an external file with a justification in the form, that there are no permissions/passwords required and no expiry on the link. (Consider double checking in incognito mode.)
- I have added a picture of a normal distribution curve in the blank space at the bottom of this page. Note: It can be a sketch of your own if you're using a touch screen or you can just grab one online and pop it in. Not meant to be hard, I just want to see if you actually read this part.
- I understand that the form must be submitted by 3:03 p.m. ET, on Friday, May 13 to be considered.
- I understand that this request can be rejected if the instructions are not followed, including the silly one about the normal distribution, and that I/we may not be given an opportunity to resubmit if this is the case.
- I understand that I can ask for help on Piazza before submitting if I do not understand any of these instructions.
